Description

When an incremental publish is performed the old updateinfo.xml is not removed if a checksum is specified. Each publish adds a new updateinfo, which has a different checksum.

After each publish there should be only one updateinfo.xml in the repodata directory.

History

#1 - 06/12/2015 04:51 PM - mhrivnak

- Priority changed from Normal to Low

- Triaged changed from No to Yes

#2 - 01/11/2016 11:30 PM - bmbouter

- Description updated

Perhaps other metadata files could leave vestiges also, the fixer should verify that an incremental publishes which must republish all files in repodata properly removes the old ones.

#4 - 08/03/2016 04:17 PM - bmbouter

- Status changed from NEW to CLOSED - DUPLICATE

Closing this as a duplicate. It was the first report of it, but the other one has a full reproducer.
