**Description**

If to delete a rpm from a nonexisting repo, there is no error message that such a repo doesn't exist. Instead it says "Nth was found". A user can take it as a rpm s/he wants to delete doesn't exist. I expect a msg that a repo is not found.

```
>> rpm -qa pulp-server
pulp-server-2.7.0-0.3.beta.el7.noarch

>> pulp-admin rpm repo list
+-----+
|                                     |
|                               RPM Repositories                               |
|                                     |
+-----+

Id:                zoo_repo
Display Name:      zoo_repo
Description:       None
Content Unit Counts:
  Erratum:         4
  Package Category: 1
  Package Group:   2
  Rpm:             32

>> pulp-admin rpm repo remove rpm --repo-id zoo --str-eq='name=dog'
This command may be exited via ctrl+c without affecting the request.

[\\]
Running...

Nothing found that matches the given criteria.

I expect error that repo is not found as for

>> pulp-admin rpm repo sync run --repo-id zoo
+-----+
|                                     |
|                               Synchronizing Repository [zoo]                               |
|                                     |
+-----+

The following resource(s) could not be found:

zoo (repo_id)
```

we should add here validation of the repo <https://github.com/pulp/pulp/blob/master/server/pulp/server/webservices/views/repositories.py#L1252> like here <https://github.com/pulp/pulp/blob/master/server/pulp/server/webservices/views/repositories.py#L1199>

This bug can be fixed easily, but it should wait until <https://github.com/pulp/pulp/pull/1931> has been merged to avoid fixing the same problem twice, once with pymongo, once with mongoengine.
