<b>Groomed:</b> No	<b>Sprint:</b>
<b>Sprint Candidate:</b> No	<b>Quarter:</b>
<b>Description</b>	
There are several working names currently being used: <ul style="list-style-type: none"><li>• The section of the config in server.conf is named 'lazy'</li><li>• Various keys and values contained in the 'lazy' section: streamer_cache_timeout, streamer_port, streamer_interface, redirect_url</li><li>• The pulp streaming software (and its rpm name) is called 'pulp-streamer'</li><li>• The comps.xml definition that installs squid and pulp-streamer is called 'pulp-lazy'</li><li>• The feature overall is called 'lazy active' and 'lazy passive'</li><li>• The importer config key named 'lazy_sync' which is how to enable this via the API</li><li>• The pulp-admin option is currently slated to be named '--lazy=active' or '--lazy=passive'</li></ul> Perhaps there would be better names than these. Post your name suggestions as comments on this thread.	

#### History

##### #1 - 08/18/2015 09:12 PM - rbarlow

Pulp Just In Time Content Loader Plus (PJITCLP)!

But srsly, people know what JIT means so it could be cool.

##### #2 - 08/18/2015 10:04 PM - bmbouter

- Description updated

##### #3 - 08/18/2015 11:17 PM - bmbouter

- Description updated

##### #4 - 08/24/2015 01:13 PM - pgassmann

actually I see it as a caching proxy mode.  
Considering this, there should also be a discard/flush option.

##### #5 - 10/07/2015 10:29 PM - jortel@redhat.com

Team does not seem to care so going with "Lazy".

##### #6 - 10/07/2015 10:30 PM - jortel@redhat.com

- Status changed from NEW to CLOSED - WONTFIX
