<b>Description</b>			
When using a broker string in the the [tasks] section as follows, instead of connecting to 'localhost' it connects to '127.0.0.1'.			
<code>qpid://localhost:5671</code>			
I expect it to connect to localhost since that is specifically the hostname specified. This is an important difference if someone were to be using SSL cert verification and the cert's CN specified localhost.

#### History

##### #1 - 09/10/2015 11:01 PM - bmbouter

The issue is in the underlying Kombu implementation so this will involve a new patch for Pulp's downstream Kombu.
