

Docker Support - Issue #128

Running repo sync on feedless docker repos should error out similar to rpm repos

01/22/2015 07:44 PM - pthomas@redhat.com

Status:	CLOSED - CURRENTRELEASE	Start date:	
Priority:	High	Due date:	
Assignee:	mhrivnak	Estimated time:	0:00 hour
Category:			
Sprint/Milestone:			
Severity:	2. Medium	Groomed:	No
Version - Docker:		Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
Target Release - Docker:	1.0.0	Sprint:	
OS:		Quarter:	
Triaged:	Yes		

Description

If you run repo sync on a feedless docker repo, the error message does not make any sense.

```
[root@cloud-qe-17 ~]# rpm -qa |grep docker
python-pulp-docker-common-0.2.2-1.el7.noarch
docker-1.3.2-4.el7.x86_64
```

1. Create a feedless docker repo
2. Run repo sync

```
[root@cloud-qe-17 ~]# pulp-admin docker repo create --repo-id no-feed
Repository [no-feed] successfully created
```

```
[root@cloud-qe-17 ~]#
[root@cloud-qe-17 ~]# pulp-admin docker repo sync run --repo-id no-feed
```

```
Synchronizing Repository [no-feed]
```

This command may be exited via ctrl+c without affecting the request.

Retrieving metadata
