#### Description

So I got following traceback when I was trying to remove the docker repository:

```
"traceback": "Traceback (most recent call last):\n  File \"/usr/lib/python2.6/site-packages/celery-3.1.16-py2.6.egg/celery/app/trace.py\", line 240, in trace_task\n    R = retval = fun(*args, **kw\nargs)\n  File \"/home/brq/jluza/rcm-pulp/server/pulp/server/async/tasks.py\", line 328, in __call__\n    return super(Task, self).__call__(*args, **kwargs)\n  File \"/usr/lib/python2.6/site-packages/celery-3.1.16-py2.6.egg/celery/app/trace.py\", line 437, in __protected_call__\n    return self.run(*args, **kwargs)\n  File \"/home/brq/jluza/rcm-pulp/server/pulp/server/tasks/repository.py\", line 41, in delete\n    manager.delete_repo(repo_id)\n  File \"/home/brq/jluza/rcm-pulp/server/pulp/server/managers/repo/cud.py\", line 286, in delete_repo\n    raise pe\nPulpExecutionException: Pulp exception occurred: PulpExecutionException\n",\n"worker_name": "reserved_resource_worker-1@rcm-pulp-02-dev.app.eng.bos.redhat.com"
```

```
"error": {\n  "code": "PLP0000",\n  "data": {},\n  "description": "Pulp exception occurred: PulpExecutionException",\n  "sub_errors": [\n    {\n      "code": "PLP0000",\n      "data": {},\n      "description": "get_master_publish_dir() takes exactly 3 arguments (2 given)",\n      "sub_errors": []\n    }\n  ]\n},
```

suggested fix:

[https://github.com/midnightercz/pulp\\_docker/commit/c2b7a8deda7047a5c6f676dad1d9eb092fd8de](https://github.com/midnightercz/pulp_docker/commit/c2b7a8deda7047a5c6f676dad1d9eb092fd8de)

#### History

#1 - 10/02/2015 04:58 PM - mhrivnak

- Status changed from NEW to ASSIGNED

- Assignee set to rbarlow

- Priority changed from Normal to High

- Triaged changed from No to Yes

#2 - 11/12/2015 05:14 PM - rbarlow

- Target Release - Docker set to 2.0.0

**#3 - 02/02/2016 08:31 PM - rbarlow**

- Status changed from ASSIGNED to 5

I attempted to verify this in the Fedora Rawhide build of Pulp, but was unable to do so due to a Docker core dump issue I filed: [https://bugzilla.redhat.com/show\\_bug.cgi?id=1304062](https://bugzilla.redhat.com/show_bug.cgi?id=1304062)

On my Vagrant F23 environment it does seem that I can delete v1 (busybox) and v2 (registry) repos that have been published:

```
$ pulp-admin docker repo delete --repo-id busybox
This command may be exited via ctrl+c without affecting the request.
```

```
[\]
Running...
```

```
Repository [busybox] successfully deleted
```

```
[vagrant@dev ~]$ pulp-admin docker repo delete --repo-id registry
This command may be exited via ctrl+c without affecting the request.
```

```
[\]
Running...
```

```
Repository [registry] successfully deleted
```

**#4 - 03/01/2016 11:48 PM - rbarlow**

- Status changed from 5 to 6

This is tested by <https://github.com/PulpQE/pulp-smash/pull/148>

**#5 - 03/23/2016 08:01 PM - dkliban@redhat.com**

- Status changed from 6 to CLOSED - CURRENTRELEASE

**#7 - 04/15/2019 10:42 PM - bmbouter**
