Description			
<p>As part of Software Pipeline project in Red Hat, we would like to use Pulp as repository for various upstream packages.</p> <p>AFAIK Pulp is unable to host those native formats. So we are forced to use another solution. Likely Sonatype Nexus. It would be nice if you can support those formats in close feature, so we can use Pulp only.</p> <p>I understand that this is being worked on, so adding for tracking purposes.</p>
