| With Fedora 22 DNF will be the default instead of yum[0].  |                     |                        |           |
| This task is to subscribe to a pulp rpm repo and download content with DNF. The output of this task is not necessarily to fix any issues but just to put in bugzilla entries for any breakage. |                     |                        |           |
