fixing doc blocks, and passing correct Repository object to controller

<https://pulp.plan.io/issues/1453>

History

#1 - 12/21/2015 11:01 PM - mhrivnak

This doc block is incorrect:

https://github.com/pulp/pulp/blob/32f4f4de9742d7a8fdf51e347d616ee528b0e53b/server/pulp/plugins/util/publish_step.py#L485

It should return the old style repository object.

#2 - 12/21/2015 11:04 PM - mhrivnak

This needs to add a ".repo_obj" to the expression being passed into the controller, to get the new-style Repository object.

pulp_docker and pulp_ostree both use the SaveUnitsStep and will likely need to be fixed.
