<b>Version - Nectar:</b>		<b>Sprint:</b>	
<b>Platform Release:</b>	2.8.0	<b>Quarter:</b>	
<b>Target Release - Nectar:</b>			
<b>OS:</b>			
<b>Triaged:</b>	Yes		

#### Description

It seems that we made an additive change to Nectar 1.4.5. During a Pulp sync with nectar < 1.4.5, I see this in the logs:

```
celery.worker.strategy:INFO: Received task: pulp.server.managers.repo.sync.sync[f700c1c6-4b5a-4b35-8357-db8eb703289e]
py.warnings:WARNING: (31271-34880) /usr/lib64/python2.7/site-packages/pymongo/topology.py:74: User Warning: MongoClient opened before fork. Create MongoClient with connect=False, or create client a fter for

args)
celery.worker.job:ERROR: (31002-34880) TypeError: __init__() got an unexpected keyword argument 'w
orking_dir'
```

Because this `working_dir` parameter is a new feature, it should be introduced as 1.5.0, not a z release.

This is important because downstream integrators can't know when they need to set version requirements on dependencies. For example, I did not think it was necessary to set `nectar >= 1.4.5` in my spec file since 1.4.3 (the current version on my Fedora dev box) should be API sufficient.
