

RPM Support - Issue #1767

Errors when synchronizing from a mirror list

03/11/2016 07:21 AM - gehogan3

Status:	CLOSED - DUPLICATE	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:			
Sprint/Milestone:			
Severity:	2. Medium	Groomed:	No
Version:	2.7.1	Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
OS:	CentOS 7	Sprint:	
Triaged:	No	Quarter:	
Description			
<p>When synchronizing the EPEL repo from http://download.fedoraproject.org/pub/epel/7/x86_64/ to my local pulp server, there was at least one server with connectivity problems. This caused several packages not to download and the subsequent publish process failed. The http repo would only list RPMs up to the failed package. (i.e. if it failed on the apbs-tools rpm, then none of the packages which fell alphabetically after that were published.) If a reliable site is chosen (i.e. kernel.org), the entire repository downloads and publishes without error.</p> <p>The command used to create the repo that was failing:</p> <pre>pulp-admin rpm repo update --repo-id=centos7-x86_64_epel --display-name="Centos7 - EPEL" --feed=http://download.fedoraproject.org/pub/epel/7/x86_64/ --validate=true</pre> <p>As I mentioned, changing the feed to: --feed=http://mirrors.kernel.org/fedora-epel/7/x86_64/ Fixed the problem.</p> <p>/var/log/messages did reflect problems with some of the mirrors:</p> <pre>Mar 10 16:18:52 admin-1-lp-202 pulp: requests.packages.urllib3.connectionpool:INFO: Resetting dropped connection: mirror.cs.princeton.edu Mar 10 16:18:52 admin-1-lp-202 pulp: nectar.downloaders.threaded:WARNING: Connection Error - http://download.fedoraproject.org/pub/epel/7/x86_64/a/aqbanking-devel-5.5.1-1.el7.x86_64.rpm could not be reached.</pre>

- Is duplicate of Issue #1210: ConnectionError - BadStatusLine during repo sync added

#4 - 03/11/2016 03:45 PM - jcline@redhat.com

Hi gehogan3, thanks for the report!

We believe this has been fixed in nectar-1.5.0, but there's also a patch that has been backported to nectar-1.3.3 (which is probably the version you're using). The patch is attached to https://bugzilla.redhat.com/show_bug.cgi?id=1248167. If you try it out and run into problems, please let us know!
