Description			
I am seeing the following:			
<ol style="list-style-type: none">1. Create a repository with a feed URL2. Sync the repository3. Check the content counts for the repository4. Remove 1 or more packages from the repository5. Re-sync the repository			
The packages that were removed from the repository do not re-appear in the repository. Meaning that if I remove all packages from the repository and then re-sync it the repository stays empty and I am unable to recover.
