```

It looks like some of the fields were moved to the _json key

Associated revisions

Revision a6f8f835 - 03/15/2016 09:50 PM - Jeremy Cline

Don't have requests re-serialize the http event data.

We make use of the BSON serializer, so we can't let requests do the serializing for us. Therefore we need to use the data kwarg rather than the json kwarg and just set the content type ourselves.

closes #1776

Revision a6f8f835 - 03/15/2016 09:50 PM - Jeremy Cline

Don't have requests re-serialize the http event data.

We make use of the BSON serializer, so we can't let requests do the serializing for us. Therefore we need to use the data kwarg rather than the json kwarg and just set the content type ourselves.

closes #1776

History

#2 - 03/15/2016 09:19 PM - jomitsch@redhat.com

This is actually a request being sent to katello's api, not a response from pulp.

After some discussion in #pulp (freenode) we suspect that the json request being sent to katello's api may be escaped unnecessarily. i.e.

```
"{"name": "bar"}"
```

instead of

```
{"name": "bar"}
```
