Version:	2.6.1	Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
OS:		Sprint:	
Triaged:	No	Quarter:	
Description			
<p>I'm syncing the pulp repo (https://repos.fedorapeople.org/repos/pulp/pulp/stable/2/6Server/x86_64/).</p> <p>A pulp-admin rpm repo sync run --repo-id run of the repo seemingly works fine, no errors are shown. However, a number of rpm's are not published, specifically the rpms for pulp 2.8.x in this case.</p> <pre>1. rpm -qa grep pulp-server pulp-server-2.6.2-1.el6.noarch</pre> <p>The package exists in /var/lib/pulp/content/rpm/pulp-server/, but there is no symlink in /var/lib/pulp/published/yum/master/yum_distributor for the package.</p>			

History

#1 - 03/31/2016 12:30 PM - ipanova@redhat.com

I used 1 repo and used 2 feeds - was not able to reproduce the situation. Symlinks are created. Used pulp 2.6.1

```
# pulp-admin -uadmin -p admin rpm repo create --repo-id pulp27 --feed https://repos.fedorapeople.org/repos/pul
p/pulp/stable/2.7/6Server/x86_64/
Successfully created repository [pulp27]
```

```
# pulp-admin -uadmin -p admin rpm repo sync run --repo-id pulp27
+-----+
|                Synchronizing Repository [pulp27]                |
+-----+
```

This command may be exited via ctrl+c without affecting the request.

#2 - 03/31/2016 02:36 PM - akegata@gmail.com

I removed the folder for the repo in `/var/lib/pulp/published/yum/master/yum_distributor/` and did a `resync`. The pulp 2.8 rpm's are now published, so the issue is solved on my end.

I am also unsure if I will be able to recreate the issue for further testing since I have only seen this happen on this specific repo.
