Is there a procedure for reproducing this bug as an end user?

#7 - 04/14/2016 03:48 PM - amacdona@redhat.com

I don't think this particular bug would be deserving of a regression test because it is no more likely that we would recreate this error here than any of the places we do string processing. This made it into the code in the first place because a test error was being hidden by other problems with the unit tests. I think that the best we can do (or at least the most we should do) is simply run pulp-smash against a RHEL 6 machine running pulp.
