Description

++ This bug was initially created as a clone of [Bugzilla Bug #960609](#) ++

Description of problem:

Estimate: 30 minutes

The data to calculate the ETA (average speed, how many bytes are left) is already available in the sync progress report, so most of the work would just be formatting the ETA for human readability. No server side changes necessary at all.

--- Additional comment from mhrivnak@redhat.com at 06/20/2013 17:19:56 ---

Mike, this is a command-line client feature request that does not affect Katello. I don't think it should block sat6.

--- Additional comment from jsherril@redhat.com at 08/19/2014 17:11:52 ---

Agreed, we can already show iso progress with what we have.
