

Nectar - Story #1915

expose connect_timeout and read_timeout via configuration

05/12/2016 05:48 PM - Anonymous

Sprint Candidate:	No		

Description

My pulp installation was having issues completing synchronization of certain external repos due to timeouts. Following discussions on this thread[0], I found that I was able to resolve this timeout by increasing the values found in /usr/lib/python2.6/site-packages/nectar/config.py:22.

I'm hoping that these timeout values can be made available from a configuration file.

My patch diff (rpm python-nectar-1.5.1-1.el6.noarch):

```
22c22
<         connect_timeout=9.05, read_timeout=57, working_dir="/tmp") :
---
>         connect_timeout=6.05, read_timeout=27, working_dir="/tmp") :
```
