Description

Hard to tell if auto-publish is set to false now or not. It's both true and false. Am I reading this right?

```
pulp-admin docker repo create --repo-id docker2 --feed http://localhost:5000 --upstream-name ubuntu
```

```
pulp-admin docker repo update --repo-id docker2 --auto-publish false
```

```
pulp-admin docker repo list --details --repo-id docker2
```

```
[vagrant@dev devel]$ pulp-admin docker repo list --details --repo-id docker2
```
