It actually works:

```
1. curl -H "Accept: application/json" -X GET -k -u admin:admin -l
https://localhost/pulp/api/v2/permissions/?resource=%2Fv2%2Factions%2Flogin%2F | python -m json.tool

Dload Upload Total Spent Left Speed

[

  },
  "_ns": "permissions",
  "id": "54660ade6754762ed6e6bd38",
  "resource": "/v2/actions/login/",
  "users": {
    "admin": [
      "READ",
      "UPDATE"
    ]
  }
}
]
```

I think an example how to do it would be helpful.
