RPM Support - Issue #2105

Importing iso content without cleaning up orphan from previous import fails

07/25/2016 11:24 PM - bmbouter

Status:	CLOSED - WONTFIX		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**Estimated time:**	0:00 hour
Category:				
Sprint/Milestone:				
Severity:	2. Medium		**Groomed:**	No
Version:	2.11.0		**Sprint Candidate:**	No
Platform Release:			**Tags:**	Pulp 2
OS:			**Sprint:**	
Triaged:	Yes		**Quarter:**	

Description

Consider this reproducer. Observe the following upload works.

```
pulp-admin iso repo delete --repo-id test
pulp-admin orphan remove --all
pulp-admin iso repo create --repo-id test
pulp-admin iso repo uploads upload --file cow-2.2-3.noarch.rpm  --repo-id test
```

Now delete but don't remove orphans

```
pulp-admin iso repo delete --repo-id test
```

Now try to create and upload again and observe the same traceback.

```
pulp-admin iso repo create --repo-id test
pulp-admin iso repo uploads upload --file cow-2.2-3.noarch.rpm  --repo-id test
```

The user will see this error specifically:

```
Task Failed

The importer iso_importer indicated a failed response when uploading iso unit to
repository test.
```

History

#1 - 07/26/2016 05:01 PM - amacdona@redhat.com

- Triaged changed from No to Yes

#2 - 12/20/2016 06:16 AM - rmcgover

- Version set to 2.11.0

This doesn't only affect delete/create repo without cleaning orphans, but also simply trying to upload the same file to more than one repo, e.g.

```
pulp-admin iso repo uploads upload --file testfile.txt  --repo-id test
pulp-admin iso repo uploads upload --file testfile.txt  --repo-id test2
```

In that example, the second command will fail with the same message reported here.
It differs from RPM upload behavior, where the existing unit in the DB will be found and associated.
