**Description**

The data in the *consumer\_bindings* collection needs to be migrated into the *consumer\_distributor* table in postgres.

For each field in the *consumer\_bindings* document:

```
consumer_bindings => consumer_distributor
_____ | _____
_id => id (generated)
consumer_id => consumer_id (by Consumer relation)
distributor_id => distributor_id (by Distributor relation)
repo_id => (omitted: each distributor record has a unique id and is associated with a repository)
binding_config => (omitted: supported deprecated nodes)
notify_agent => (omitted: supported deprecated agent)
consumer_actions => (omitted: supported deprecated agent)
deleted => (omitted: supported deprecated agent)
```

**Note:** Both the *Agent* and *Nodes* are not included in 3.0.
