<b>Platform Release:</b>		<b>Sprint:</b>	Sprint 10
<b>Groomed:</b>	Yes	<b>Quarter:</b>	
<b>Sprint Candidate:</b>	Yes		
<b>Description</b>			
<p>Django <a href="#">User model has some limitations like 30 chars for a username</a>, so we have to <a href="#">substitute</a> it with our own one. It is probably not a bad idea to keep our implementation as close as possible to the Django one, so we will be able to use mostly as-is the related classes like UserManager, UserAdmin. At the same time we will have some attributes which we currently do not use.</p> <p>In case we use django-guardian for authz, which seems likely, be sure to read this: <a href="https://django-guardian.readthedocs.io/en/stable/userguide/custom-user-model.html">https://django-guardian.readthedocs.io/en/stable/userguide/custom-user-model.html</a></p>
