Groomed: No	Quarter:
Sprint Candidate: No	

Description

++ This bug was initially created as a clone of [Bugzilla Bug #1085070](#) ++

Description of problem:

I would like to create a user that can push content into all existing repositories but not edit the repositories themselves. That means:

UPDATE on /v2/repositories/<repo_id>/actions/import_upload/

Without wildcards, the permission needs to be granted separately for each repo. Instead, it would be helpful to have:

UPDATE on /v2/repositories/*/actions/import_upload/
