Description

Motivation

With upcoming content migration from Pulp 2 (which can be done by content type), it becomes important to have control which orphans to delete and avoid removing content which was recently migrated but hasn't been added to any repository yet.

Suggestion

Add type parameter to the orphan cleanup endpoint to filter what to delete:
\$ http DELETE /pulp/api/v3/orphans/ type=file

Only artifacts related to the specified content type should be removed.
