

Pulp - Story #249

[RFE] nested pulp-admin sessions

02/19/2015 02:19 AM - igulina@redhat.com

Status:	CLOSED - WONTFIX	Start date:	
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0:00 hour
Sprint/Milestone:		Tags:	Pulp 2
Platform Release:		Sprint:	
Groomed:	No	Quarter:	
Sprint Candidate:	No		

Description

++ This bug was initially created as a clone of [Bugzilla Bug #1134510](#) ++

Description of problem:

Description of problem:

Pulp-admin supports login command from one user to another without prior logout.

So far, every new login command rewrite/removes the granted certificate of the previous user. After logout command the user doesn't have his session back with a granted certificate anymore. So s/he has to login again.

Nested sessions like in bash shell would be nice feature especially for users with admin roles.

Steps to Reproduce:

```
pulp-admin login -u admin -p admin
```

Successfully logged in. Session certificate will expire at Oct 9 20:19:42 2015 GMT.

```
pulp-admin repo list
```

Repositories

Id: gena

Display Name: gena

Description: None

Content Unit Counts:

```
pulp-admin login -u user1 -p test1
```

Successfully logged in. Session certificate will expire at Oct 9 20:20:23 2015 GMT.

```
pulp-admin repo list
```

Repositories

Insufficient Permissions

The user does not have the appropriate permissions to execute this command.

```
pulp-admin logout
```

Session certificate successfully removed.

```
pulp-admin repo list
```

Repositories

Authentication Failed

Use the login command to authenticate with the server and download a session certificate for use in future calls to this script. If credentials were specified, please double check the username and password and attempt the request again.

Expected results:

1. Log as user [#1](#)
2. Execute some pulp-admin commands without -u/-p options
3. Log as user [#2](#) without logout from the user [#1](#) session
4. Execute some pulp-admin commands without -u/-p options as user [#2](#)
5. logout
6. return back to the session of user [#1](#) and be able to execute pulp-admin commands without -u/-p options since the certificate of user [#1](#) should be still valid

History

- Priority changed from Normal to Low

Can you think of any other applications that support this? It seems like an unusual feature to me.

#2 - 04/12/2019 07:48 PM - bmbouter

- Status changed from NEW to CLOSED - WONTFIX

#3 - 04/12/2019 07:52 PM - bmbouter

Pulp 2 is approaching maintenance mode, and this Pulp 2 ticket is not being actively worked on. As such, it is being closed as WONTFIX. Pulp 2 is still accepting contributions though, so if you want to contribute a fix for this ticket, please reopen or comment on it. If you don't have permissions to reopen this ticket, or you want to discuss an issue, please reach out via the [developer mailing list](#).
