Description

++ This bug was initially created as a clone of Bugzilla Bug #1146726 ++

Description of problem:

Description of problem: When creating an event the current --event-type will be triggered on success and failed events. I would like a way to only trigger when an event is occured to limit the amount of alerts sent.

Version-Release number of selected component (if applicable): 2.4.1

How reproducible: N/A

Steps to Reproduce:
1. create an event with event type repo.sync.*
2. Get an email every time a repo is synced
3. filter the emails and ignore them

Actual results: Emails/alerts are triggered for success or failed events

Expected results: Emails should only be sent when an error occurs

--- Additional comment from mhrivnak@redhat.com at 09/26/2014 14:37:28 ---

FWIW our whole notification system is due for a re-think in the not-so-distant future. Thanks for the feedback.
