#3 - 02/21/2017 08:54 PM - bizhang

It looks like some of the packages were added to the repo after the repo was created, which is unexpected. I probably made a mistake somewhere while building, and will keep check the last updated time for the packages when building GA.

I re-rsync'd the packages, and a simple test of
`yum install python-amqp-1.4.9`
now installs the package as expected

#4 - 02/22/2017 05:04 PM - pthomas@redhat.com

Verified that 2.12.1 beta can be installed on el7 and fedora 24 without any dependency issues.

#5 - 02/23/2017 05:03 PM - bizhang

- Status changed from NEW to 5

#6 - 03/06/2017 05:02 PM - semyers

- Status changed from 5 to CLOSED - CURRENTRELEASE

I believe that we fixed this by republishing the repo, and this is no longer blocking 2.12.z.
