**Description**

++ This bug was initially created as a clone of [Bugzilla Bug #1159214](#) ++

Description of problem:

Description of problem:  
It would be nice to run pulp apache on different port then 80. The use case is to use lighttpd/nginx for repo serving and do not expose pulp apache publicly and have it only available to localhost.

Version-Release number of selected component (if applicable):  
pulp-server-2.4.3-1.fc20.noarch

I will try to point out bumpers on the road as I try to move it to different port.

For starter, If I manually change Port in apache config, there is problem with /etc/httpd/conf.d/pulp.conf having:

```
<VirtualHost :80>  
Include /etc/pulp/vhosts80/.conf  
</VirtualHost>
```

This can be safely changed to

```
<VirtualHost >  
Include /etc/pulp/vhosts80/.conf  
</VirtualHost>
```
