

## Pulp - Story #2708

As a user using pulp-admin I can list sync operations run on repositories in the past

04/13/2017 05:57 AM - ulif

<b>Status:</b>	CLOSED - WONTFIX	<b>Start date:</b>

<b>Sprint Candidate:</b>	No		

### Description

Using a new switch, users should be able to list details about last sync operations and their status.

For instance:

```
$ pulp-admin repo list --syncs
```

could result in output similar to this:

```
+-----+
| Repository | Last Sync           | Duration   | Status     |
+-----+
| foo        | 2016-01-02 12:13    | 2 h 13 min | completed  |
| bar        | 2016-01-02 13:12    | 32 min     | failed     |
+-----+
```

As far as I can see, there is no simple possibility to retrieve such infos otherwise with `pulp-admin`.

A first try to implement functionality like this was done in github PR [#2889](https://github.com/pulp/pulp/pull/2889) at <https://github.com/pulp/pulp/pull/2889>.

To implement this as a new option of the `pulp-admin repo` section (and not as part of the `tasks` section) felt natural to me as we handle done tasks always related to repos here. Other infos one get via `pulp-admin tasks` are normally geared towards current or future events (I might have missed something here).

I would like to add a checklist, but am not sure how to do this with redmine. I therefore add some points here:

### Checklist:

- `pulp-admin` supports a new option (in the `repo` or `tasks` section) to list sync ops as described above.
- Output lists all registered repos
- Output copes with long repo names
- Tests prove that all this is working
- Docs exist to explain the new option and what it does.

### History
