

## Pulp - Issue #2828

### yum plugin documentation states that ssl\_client\_cert is looking for a file and not certificate data

06/21/2017 08:15 PM - mikea

**Description**

From the page: [https://docs.pulpproject.org/plugins/pulp\\_rpm/tech-reference/yum-plugins.html](https://docs.pulpproject.org/plugins/pulp_rpm/tech-reference/yum-plugins.html)  
ssl\_client\_cert

Certificate used as the client certificate when synchronizing the repository. This is used to communicate authentication information to the feed source. The value to this option must be the full path to the certificate. **The specified file may be the certificate itself or a single file containing both the certificate and private key.**

This API option is actually looking for certificate text and not a path to a file.

#### History

##### #2 - 06/23/2017 04:42 PM - bmbouter

Can an example be shown demonstrating that Pulp doesn't support the path to a file option like the docs say?

##### #3 - 06/23/2017 05:05 PM - ttereshc

- Triaged changed from No to Yes

##### #4 - 04/12/2019 09:44 PM - bmbouter

- Status changed from NEW to CLOSED - WONTFIX

##### #5 - 04/12/2019 09:46 PM - bmbouter

Pulp 2 is approaching maintenance mode, and this Pulp 2 ticket is not being actively worked on. As such, it is being closed as WONTFIX. Pulp 2 is still accepting contributions though, so if you want to contribute a fix for this ticket, please reopen or comment on it. If you don't have permissions to reopen this ticket, or you want to discuss an issue, please reach out via the [developer mailing list](#).
