**Description**

As a user, I can sync a list of projects from PyPI

This story is complete when:

- I can initiate a sync from PyPI
- The sync completes without error
- I can see that the expected content was added to the repo
  - Syncing a project includes all releases
  - Syncing a release includes all distribution packages

For the description, I would focus the active verb on "sync" rather than CRUD, similar to the title. We covered CRUD elsewhere.

The completion criteria for this could be:

- I can initiate a sync
- The sync completes without error
- I can see that the expected content was added to the repo
