Description	
Add publication and distribution models as defined in #2868	
The Publication, PublishedArtifact and PublishedMetadata models should be imported into the plugin API to support publishing.

History

#1 - 07/12/2017 08:01 PM - mhrivnak

To confirm, we are deliberately not creating serializers and viewsets for this right now, correct? That would be valuable to capture in the description with a quick explanation for why.

Correct. I don't think we have a use case for exposing publications through the REST API. Publications no longer referenced by any Distribution can be cleaned up by something internal to the platform.

Although, we may need to expose Publications though REST API for Distribution promotion work flows.

This probably needs further discussion.

#3 - 07/13/2017 09:27 PM - jortel@redhat.com

- Subject changed from *Add Publication models.* to *Add Publication and Distribution models.*

#4 - 07/14/2017 09:16 PM - mhrivnak

- Sprint/Milestone set to 41
- Groomed changed from No to Yes
- Sprint Candidate changed from No to Yes

This looks good to me. I'm adding it to the sprint, as we anticipated would happen during the last sprint planning meeting.

Even if there are any questions about [#2868](#), I think this is a good starting point that is not likely to see much or any changes.

#5 - 07/17/2017 01:22 PM - ttereshc

- Blocks Task #2905: *Add abstraction for Publishing to the plugin API* added

#6 - 07/17/2017 05:46 PM - jortel@redhat.com

- Related to Story #2872: *As an authenticated user, I can create a Content unit from one or more artifacts* added

#7 - 07/17/2017 05:47 PM - jortel@redhat.com

Modeling changes in [#2872](#) impact this work. Specifically. the `PublishedArtifact.artifact_id` would need to be `PublishedArtifact.content_artifact_id`.
