Description

Occasionally, if a user is deleting a large number of hosts, one may fail during the run and be retried. If a host is deleted but its qpuid queue is already gone, the delete will fail. Instead, the delete should continue, since it's trying to delete something that isn't there.

```
no such queue: pulp.agent.6d89102a-c6d7-4d52-920a-f6811f4ddb17
```

```
Traceback (most recent call last):
