Pulp - Story #3218

Story # 3209 (MODIFIED): As a user, I have Repository Versions

As an authenticated user, I can list repository version content, added content, removed content

12/19/2017 05:09 PM - dkliban@redhat.com

Status:	MODIFIED		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	daviddavis		**% Done:**	100%
Category:			**Estimated time:**	0:00 hour
Sprint/Milestone:	3.0			
Platform Release:			**QA Contact:**	
Blocks Release:			**Complexity:**	
Backwards Incompatible:	No		**Smash Test:**	878
Groomed:	Yes		**Verified:**	No
Sprint Candidate:	Yes		**Verification Required:**	No
Tags:			**Sprint:**	Sprint 31

Description
Three detail routes need to be added to the RepositoryVersion viewset.
/api/v3/repositories/<uuid>/versions/<id>/content/ - paginated list of all content in particular version
/api/v3/repositories/<uuid>/versions/<id>/added_content/ - paginated list of content added since the previous version
/api/v3/repositories/<uuid>/versions/<id>/removed_content/ - paginated list of content removed since the previous version

- Parent task set to #3209

#2 - 01/03/2018 10:53 PM - dkliban@redhat.com

- Subject changed from Add RepositoryVersion Model and Viewset to As an authenticated user, I can list repository version content, added content, removed content

- Description updated

#3 - 01/03/2018 11:15 PM - daviddavis

- Groomed changed from No to Yes

#4 - 01/04/2018 04:09 PM - mhrivnak

There's an important bit of nuance to the "added" and "removed" attributes that's worth capturing. They are derived attributes whose state depends on the state of previous versions. You could define them as:

"The set of content added/removed since the previous known version that has not been deleted."

The result is that deleting a version will cause the next version to inherit some or all of its changes. For example: If version 2 adds A, and version 3 adds B, then you delete version 2, the result is that version 3 will be shown as having added A and B.

Since they represent the differences between two versions, that makes them quite a bit different from the "content" attribute which is immutable and scoped to a single object. It would be a good idea to communicate this clearly in the API docs.

I wrestled with whether or not to even include the "added" and "removed" attributes directly on each version representation. Ultimately I kept them at least as a way to demonstrate how easy it is to get that information, but it might be worth considering if there is a more clear way to present it.

#5 - 01/09/2018 05:36 PM - dkliban@redhat.com

- Sprint/Milestone set to 53

#6 - 01/09/2018 07:46 PM - daviddavis

+1 to @mhrivnak's proposal of updating our docs. Added a checklist item to do so.

#7 - 01/10/2018 08:46 PM - daviddavis

- Description updated

#8 - 01/15/2018 07:10 PM - daviddavis
