Groomed: Yes	Verification Required: No
Sprint Candidate: Yes	Sprint: Sprint 42
Tags: Documentation, Plugin Template	
Description	
<p>The documentation for plugin writers needs to explain that a new repository version should be created any time the content of a repository changes.</p> <p>There are two places to consider.</p> <p>A high level explanation of the options (currently, just using RepositoryVersion as a context manager) should be included in the sync documentation in the plugin-writer docs. https://github.com/asmacdo/plugin_template/blob/add-plugin-writer-docs/docs/plugin-writer/tasks/add-remove.rst</p> <p>A specific example is included in the sync task in the plugin_template. Please check that the comments are sufficient, and that they match the explanation in the plugin writer docs. https://github.com/asmacdo/plugin_template/blob/add-plugin-writer-docs/pulp_plugin_template/app/tasks/synchronizing.py#L39</p> <p>Given that more work is being done with the DeclarativeVersion, keep in mind that what is added by this task will be expanded/revised soon.</p> <p>Do not include custom views in this task.</p>
