

RPM Support - Issue #3257

pulp does not ask, provide or configure entitlement certificate key

01/08/2018 04:59 PM - balonik

Status:	CLOSED - WONTFIX	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:			
Sprint/Milestone:			
Severity:	2. Medium	Groomed:	No
Version:	2.14.0	Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
OS:		Sprint:	
Triaged:	Yes	Quarter:	
Description			
Hi,			
#1 There is no option during 'pulp-admin rpm repo create' to also provide entitlement certificate key			
#2 no entitlement certificate key is provided to consumer during binding			
#3 pulp-consumer 'rpm bind --repo-id=foo' does not configure any 'sslclientkey' in pulp.repo			
Environment:			
RHEL 7.4			
pulp-consumer-client-2.14.3-1.el7.noarch			
pulp-server-2.14.3-1.el7.noarch			
Expected Result:			
#1 'pulp-admin rpm repo create' should have new option to include entitlement key			
#2 during 'pulp-consumer rpm bind' the key should be copied to consumer with certificate			
#3 'sslclientkey' should be set in 'pulp.conf' for repository so the 'yum' commands won't fail each time with curl's error 'invalid key'			
Thanks.

As a workaround, suggest you include the key (PEM) in the certificate file. YUM should work with that. Can you try that?
