<b>Description</b>			
We currently get a lot of errors when building our docs with sphinx 1.6.6. We need to figure out if this is a bug in sphinx or there is a new config we need to change.			

#### Associated revisions

##### Revision e01f0498 - 01/12/2018 03:38 PM - milan

Fix doc build (warning) errors

Sphinx in 1.6.6 fixed a regression that would allow doc build warnings to pass unnoticed<sup>1</sup>. Thus having updated Sphinx would have broken one's Pulp docs build.

This patch addresses the doc build warnings as well as fixes a broken link here and there.

[1] <https://github.com/sphinx-doc/sphinx/issues/3919>

closes: #3275

## History

---

### #1 - 01/11/2018 02:27 PM - milan

- Assignee set to milan

Bisecting Sphinx shows that our docs start failing to build with the [Sphinx commit 90352cf](#) that in turn supposed to fix the [Sphinx regression 3919](#) i.e correct the behavior when treating warnings and nitpicking as errors; we'd better fix our docs or disable the warning as an error feature (as an alternative to pinning the Sphinx version)

### #2 - 01/11/2018 05:00 PM - bmbouter

I'm +1 to fixing the docs and not disabling the warnings as errors feature.

### #3 - 01/11/2018 05:04 PM - milan

- Status changed from NEW to ASSIGNED  
- Sprint/Milestone set to 53
