- Priority changed from Normal to High

The PyPi installation docs are here: <https://docs.pulpproject.org/en/3.0/nightly/installation/instructions.html#pypi-installation>

I think it's separate from the db-reset script. I think the issue is that there is no step to makemigrations and there must be to produce a working installation.

I think it's right that this be an issue because it's a defect in the installation guide. +1 to adding it to the sprint. It's high priority so I'm changing it to high.
