Description			
Based on the Plugin Writer's Coding Workshop Feedback , specific things, Qpid vs Rabbitmq defaults confusion. The settings.yaml says we default to Qpid so folks install Qpid, but really in settings.py it's Rabbitmq. (this is a 1 line fix)

Refer to RabbitMQ as the default broker

Since Pulp still won't run with vanilla qpid broker[1] it seems reasonable to refer to the RabbitMQ as the default broker instead.

Having switched the default "docstring" in the settings.yaml I wanted to try running development environment with RabbitMQ as a broker. My deployment failed, hitting an [epmd bug](#).

I just created a workaround patch[1] for the development environment so that folks can test Pulp3 without having to wait for an official fix.
