Description Publisher and Repository fields are not required fields for a standard distribution. If both are provided, this distribution will automatically update to the newest publication every time the specified publisher publishes the specified repository. This issue is to make this clear in the documentation (by fixing in-code comments) https://github.com/pulp/pulp/blob/3.0-dev/pulpcore/pulpcore/app/models/publication.py#L180-L183

It might be also worth considering renaming the fields (e.g. auto_distro_publisher, auto_distro_repository).

#6 - 05/11/2018 08:11 PM - kersom

These fields will be used to auto-distribute feature. Currently there is no mention to such feature in the docs.

#7 - 11/29/2018 02:07 AM - amacdona@redhat.com

- Subject changed from Clarify publisher and repository fields on distribution model to Document Autodistribution

IMO this is clear in the help text on the distribution serializer. Still, the auto-distribution feature should be documented outside of the API docs, maybe in "Workflows"

#9 - 04/24/2019 05:20 PM - amacdona@redhat.com

- *Status changed from NEW to CLOSED - DUPLICATE*

Autodistribution will be covered by <https://pulp.plan.io/issues/4680>, so closing as a dupe.
