Description

We have some task functionality that I don't think QE can test with pulp-smash:

Some examples:
<https://pulp.plan.io/issues/3226>
<https://pulp.plan.io/issues/3222>
<https://pulp.plan.io/issues/3186>

We need similar tests for Publications.

Also, it would be good to have a test to test out Task cancellation.

- Subject changed from *Write unit tests for Repository Version and Publication task code* to *Write unit tests for task code*

I don't think this should be limited to RepositoryVersions and Publications necessarily.
