

Pulp - Story #3415

As a plugin writer, the HttpDownloader's automatically support metalink 4.0 support

Sprint Candidate:	No		

Description

The HttpDownloader's should be able to detect when metalink is being used as a discovery mechanism and should do the following:

1. Fetch the file from a url referred to in the metalink
2. Validate the data using the checksum specified in the metalink

This support would be added to existing HttpDownloader's in the Plugin API.
