Description	
Create a distributor with a space in its base path and you'll get an error message saying ""Enter a valid URL." We're using django's URLValidator which produces this message:	
https://github.com/django/django/blob/master/django/core/validators.py#L102	
We ought to raise a more informative message about what constitutes a valid url path.

Revision 9a9e9c93 - 04/23/2018 04:52 PM - CodeHeeler

Provide more informative invalid base path error

Default message provided by Django's URLValidator is simply:
"Enter a valid URL"
Check for spaces in path before this call and raise ValidationError if found.
