

RPM Support - Task #3746

Story # 3740 (CLOSED - CURRENTRELEASE): Implement modularity content dependency solving

Investigate, whether exposing the @pool->considered@ bitmap is necessary for the modular dependencies to be resolved

06/08/2018 12:19 PM - milan

Sprint Candidate: No	

Description

It might be the case that to support the functionality described in issue [#3740](#), exposing the pool->considered bitmap needn't be necessary.

Considering the [POC](#), it might be sufficient to just ignore the target repository content while building the pool to resolve the copy query.

History

#1 - 10/03/2018 01:35 PM - milan

- Status changed from NEW to CLOSED - COMPLETE

Closing this issue because masking the non-modular/ursine RPMs is needed to be able to transitively calculate all the modular dependencies.
