Pulp - Issue #3856

In the bindings, href docstring is ambiguous and sometimes has the wrong type

07/16/2018 10:40 PM - daviddavis

Status:	MODIFIED	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	dkliban@redhat.com	**Estimated time:**	0:00 hour
Category:			
Sprint/Milestone:	3.0		
Severity:	2. Medium	**Sprint Candidate:**	No
Version:		**Tags:**	API Bindings
Platform Release:		**QA Contact:**	
Blocks Release:		**Complexity:**	
OS:		**Smash Test:**	
Backwards Incompatible:	No	**Verified:**	No
Triaged:	Yes	**Verification Required:**	No
Groomed:	No	**Sprint:**	Sprint 42

Description

Looking at the API bindings:

```
class RepositoriesApi(object):

    def repositories_versions_create(self, href, data, **kwargs):  # noqa: E501
        """repositories_versions_create  # noqa: E501

        :param str href: A relative URI for the resource. (required)
        :param RepositoryVersion data: (required)
        :return: AsnycOperationResponse
                If the method is called asynchronously,
                returns the request thread.
        """
        pass

    def repositories_versions_delete(self, href, **kwargs):
# noqa: E501
        """
repositories_versions_delete  # noqa: E501

        :param int href: A relative URI for the resource. (required)

        :return: AsnycOperationResponse
                If the method is called asynchronously,
                returns the request thread.
        """
```

It's not totally clear what href means. Also, for repositories_versions_delete() it says the href type is an int.

Revision b9399bcd - 08/30/2018 03:27 PM - dkliban@redhat.com

Problem: OpenAPI schema doesn't use URIs to identify resources

Solution: Create a custom OpenAPI generator that refers to resources by their URI.
