Description

It looks like some fields were renamed in the Galaxy API. From the Galaxy team:

Change the namespace query referenced in your email to: "<https://galaxy.ansible.com/api/v1/roles/?namespace\ \ name=ansible>". Namespace is now an object in galaxy, so it has an id, description, name, and other attributes that you can query.

There is no longer a 'num_pages' value returned in the response object. We return the number of results as 'count', so you can do something like, "math.ceil(float(count)/float(page_size))", in Python to calc the number of pages.

Revision 83f37760 - 08/29/2018 08:20 PM - daviddavis

Updating the sync code due to breaking changes in Galaxy in API

fixes #3946 <https://pulp.plan.io/issues/3946>

History

#1 - 08/29/2018 05:14 PM - bmbouter

- Severity changed from 2. Medium to 3. High
- Sprint set to Sprint 42

We need to get this fixed ASAP since we now know the regression won't be reversed.

#2 - 08/29/2018 08:33 PM - daviddavis

- Status changed from NEW to POST

https://github.com/pulp/pulp_ansible/pull/52

#3 - 08/29/2018 11:23 PM - daviddavis

- Status changed from POST to MODIFIED

Applied in changeset [pulp_ansible|83f377602897ebf58261ca0d92473dc57a64ac25](https://pulp.plan.io/changeset/pulp_ansible|83f377602897ebf58261ca0d92473dc57a64ac25).
