#### Description

I pip install pulp\_ansible and I receive 0.1.0rc1 with:

```
(pulp) [vagrant@pulp3 pulp]$ pip freeze | grep ansible
pulp-ansible==0.1.0rc1
```

When starting any Pulp process I receive a traceback:

```

```

In the 0.1.0rc1 tagged code you can see this import [here](#) which is importing from the [tasks module here](#)

Strangely though, on the system I pip intalled 0.1.0rc1 onto I get this as my code, which is missing the 'tasks' module.
