Revision e1123708 - 11/09/2018 06:42 PM - daviddavis

Fixed bug where path wasn't used and module_dir was set to non-directory

There were two bugs here at play. First the code wasn't using the full path including extraction_dir when checking if the module file was a directory and secondly, the loop meant that module_dir could be set to a file if it didn't find a directory.

Also, fixed some flake8 errors.
