<b>Description</b>			
Currently, we auto-detect plugins and install them <sup>0</sup> . Sometimes though you don't want to automatically install plugins in your development directory so we could let developers specify in their Vagrantfile an optional list of plugins to install. If a list is not specified, fall back to auto-detecting plugins.

#### History

##### #1 - 11/15/2018 09:21 PM - daviddavis

- Subject changed from Allow developers to list specific plugins in their vagrant file to Allow developers to list specific plugins to install in their vagrant file

##### #2 - 11/16/2018 03:08 PM - bmbouter

+1 to this. I currently have to rename plugins that will fail for example pulp\_rpm to \_pulp\_rpm so that it won't be autodetected. It fails because ansible doesn't know to install the createrepo\_c wheel package from fedorapeople.

##### #3 - 11/16/2018 04:10 PM - daviddavis

- Tracker changed from Issue to Story

- % Done set to 0

##### #4 - 11/28/2018 03:26 PM - bmbouter

- Groomed changed from No to Yes

- Sprint Candidate changed from No to Yes

This looks good to me. Thanks @daviddavis.

##### #5 - 11/28/2018 05:47 PM - amacдона@redhat.com

- Sprint Candidate changed from Yes to No

This issue is with the pulp/devel repository, which has a limited future for Pulp3. Instead, we will be using the ansible-pulp3 repository, which installs plugins depending on configuration options.

**#6 - 11/29/2018 02:42 AM - amacdona@redhat.com**

- Status changed from *NEW* to *CLOSED* - *WONTFIX*

If someone is irritated by this and wants to fix, go ahead. But we don't need to keep this in the tracker.

**#7 - 04/25/2019 06:44 PM - daviddavis**

- *Sprint/Milestone set to 3.0*

**#8 - 04/26/2019 10:33 PM - bmbouter**

- *Tags deleted (Pulp 3)*
