

## Pulp - Task #4189

Story # 4188 (MODIFIED): As a Pulp3 user, I have containers

### Extend Travis build+publish pipeline to build, test, and publish vanilla core process images to quay.io

11/27/2018 12:34 AM - bmbouter

<b>Description</b>	
<p>This would add a build+test+publish of core images to the PyPI test+publish pipeline that is triggered from a new tag being added to the repo.</p> <p>So today it when that pipeline triggers it:</p> <ol style="list-style-type: none"><li>1. pulp-smash the code and if it passes</li><li>2. publish the code to PyPI</li></ol> <p>This would update that pipeline to instead build a container based on the centos7-python36 vanilla container.</p> <ol style="list-style-type: none"><li>1. pulp-smash the code and if it passes</li><li>2. build a container on top of centos7-python36 container that contains pulpcore and pulpcore-plugin</li><li>3. pulp-smash ^ container and if it passes</li><li>4. publish the code to PyPI</li><li>5. publish the container to quay.io</li></ol>
